

Robots on the Rise

By Aimee Elisabeth Bischoff
From the album "Quad"

Come on can you see
That there are robots on the rise?
Come on can you see
That there are robots on the rise?

Come on can you see
That there are robots on the rise?
They're made of shining metal
And they rocket through skies

Come on can you see
That there are robots on the rise?
They're coming to serve us
And they're here to take our lives-

Come on can you see
That there are robots on the rise?
They're coming to destroy us
They're here to rectify

Come on can you see
That there are robots on the rise?
They're coming to purge us
They're here to purify-

Come on can you see
That there are robots on the rise?
Come on can you see
That there are robots on the rise?
